NOW ALL ON DISPLAY.

## COMMUNITY PASTURES

The following petition is at W. A. Braisher, store and is being circulated throughout the district. All farmers are urged to sign same.

"Whereas in many districts in Alberta, including the district adjacent to the Village of Carbon there is scanty summer pasturage although an abundance of winter feed is usually available and with advancing years private pastures are more difficult to obtain. Therefore we the undersigned respectfully petition the Alberta government to set aside pasture lands as community pastures in districts where this is necessary."

This is a great thing for all farmers who want to keep a few head of cattle as their stock will be looked after in the summer and it saves the smaller farmer the expense of purchasing a good bull as the government will supply them to improve your herd.  
—C. Cave.

## Students Dance Statement

## FARM FOR SALE

Sealed tenders will be received up to 12 o'clock noon on the 15th day of December, 1945, by the undersigned for the purchase of the following farm lands: All of Section 9, West 1/2 of Section 15, N.W. 1/4 of Section 4, all in township 27, Range 21 West of the 4th Meridian, consisting of 1,113 acres more or less, known as the McLaughlin farm situated two miles east of the Village of Rosebud. There are approximately 450 acres in summerfallow, 450 acres in stubble and 213 acres in coulees and pasture.

The improvements consist of a dwelling, bunkhouse, hen house, pump-house, windmill, garage and workshop, shed and five granaries.

Terms of sale: 10% of offer should accompany same, the balance payable on acceptance of tender. The highest or any tender not necessarily accepted, and any tender accepted by the undersigned must be approved by the Court.

The purchaser shall take the property subject to all taxes, rates and assessments imposed after the 31st day of December, 1945, and subject to the conditions, exceptions and reservations in the existing certificate of title and in the contracts with the Canadian Pacific Railway Company and the lease now in existence, a copy of which lease may be examined at the office of the undersigned.

Tenders should be addressed to:

The Royal Trust Company,  
Calgary, Alberta,  
Judicial Trustees of the Estate  
of John Angus McLaughlin.

## LARGE CROWD AT HOCKEY GAME

Over 200 attended the first hockey game of the season last Thursday evening, which saw Carbon defeat Rockyford 6-0 and Beiseker defeated a Carbon-Rockford team 6-1. Paddy Springs, an enthusiastic group to the west were to play Beiseker, but decided that they would not sponsor a team this year, which means that they will also withdraw from the league.

If the brand of hockey played at the opening game is maintained, and naturally it will improve as the season progresses, fans will witness the best hockey this year that has been played in Carbon for some time. It is expected that facilities will be installed on the east side of the rink so that all may witness the game without crowding as was the case last Thursday.

Music was provided at the rink by Adam Kaminski, our genial showman.

## LOCKER PLANT SOLD

Johnson and Kinney of Calgary recently purchased the Carbon Locker plant from L. H. Arnold, Three Hills.

## Sprains Wrist

George White had the misfortune last week, of falling while doing the chores at home and spraining his wrist. George will be out of hockey for some time and will be missed by the local team.

## RURAL HOSPITAL DEBATE SUBJECT

Beiseker, Dec. 6th—Lively debate on the subject of municipal hospitals highlighted the meeting of the Beiseker Board of Trade. A delegation from Acme was in attendance. Extent of the territory to be observed and the size of the proposed hospital were considered.

The meeting unanimously endorsed appointment of a committee of three by board directors to make further investigation and recommendations.

## Banquet Success

Some 200 members of the Carbon Fish and Game Association enjoyed a banquet in the Scout hall on Tuesday evening. Moose and all the trimmings were served. Pictures of wild life were shown after the supper and proved to be very interesting and educational. The ladies who prepared the supper are to be congratulated for the fine food provided and for the many decorations, which were original and hand made.

## MRS. E. MARTIN HONORED

A miscellaneous shower was held at the home of Mr. and Mrs. Edward Martin on Wednesday last in honor of Mrs. Edwin Martin, a recent bride.

About 15 guests were present and enjoyed a pleasant evening, competing in two contests. Mrs. E. Martin and Miss Mabel Nash were the prize winners.

The bride's numerous gifts were presented in a model of the Carbon Trading Company where she was formerly employed.

A delicious lunch was served by the hostesses who were Mrs. J. Cooper, Mrs. Leo Ohlhausen and Miss Norma Schellke.

At the close of the evening all guests presented Mrs. Martin with their favorite recipe and household hint.

## Estimates Of Grain Crops Are Generally Down

OTTAWA—Canada's 1945 wheat production was placed at 308,000,000 bushels in the second estimate made Sept. 12 by the Dominion bureau of statistics which said that second estimates of grain crops were generally down from those of the first estimate Sept. 12.

The bureau estimated total production for this year at 378,300,000 bushels, barley at 156,300,000 bushels and flaxseed at 7,400,000 bushels.

The second estimate of wheat production was 12,900,000 bushels lower than the estimate made Sept. 12 while the oat crop was down 10,000,000 bushels. Reduction from the first estimate in the barley crop was 4,900,000 bushels while that of flaxseed was up slightly.

Most of the reduction in the second crop estimate of the wheat crop occurred in Saskatchewan where the output was now placed at 158,000,000 bushels compared with 167,000,000 in the first estimate, the barley at 156,300,000 bushels compared with 161,200,000.

"The reductions in the wheat crop estimates for Manitoba and Alberta amount to 2,000,000 bushels each. Output has been lowered by 1,000,000 bushels in Manitoba and 4,000,000 bushels in both Saskatchewan and in Alberta. The total yield of barley has been lowered 4,900,000 bushels in Manitoba, 1,000,000 bushels in Saskatchewan and 1,000,000 bushels in Alberta."

The area sown to fall wheat in the autumn of 1945 the Dominion bureau estimated at 48,000 acres, a decrease of 218,000 acres or 31 per cent. compared with the area sown in 1944 which was 69,800 acres. The condition at Oct. 31 was reported at 81 per cent. of the long-time average yield per acre compared with 101 per cent. in 1944.

LIVERPOOL—A steadily worsening supply situation in all wheat exporting countries except the United States was seen by the trade publication, Corn Trade News.

The newspaper said Canada may be unable to maintain her exports of wheat and flour for the next year or so. It added that while the Dominion may export almost as much as last season, more countries will be competing for her wheat and flour.

The article added that prospects of substantial help from either Argentina or Australia are less than bright than they were some months ago. Both report heavy domestic requirements and prior claims of neighboring countries which are likely to leave little for export to Europe, the article continued.

United States exports will almost certainly exceed 300,000,000 bushels with an abundant wheat supply, big corn and record oats crop but due to the situation in Argentina and Australia, the burden of meeting the world's essential needs will fall more heavily than ever before on North America, the paper said.

## WELL CAMOUFLAGED

German Powder Plant Escaped Bombs But Has Been Destroyed

KAUFBEUREN—Wrecking of Germany's munition industry was started by Allied demolition squads with a series of thunderous explosions which destroyed one of the biggest and most secret powder plants in the vast I. G. Farben network.

"This begins the destruction of Germany's war potential," said Lt. Gen. Lucien K. Truscott, commander of the United States Third Army as he pushed the plunger setting off the first of 14 explosions which sent 60 buildings hurtling hundreds of feet into the air.

The plant, which extended over an area of two square miles, was so cleverly camouflaged and masked by the surrounding evergreen forest that not a single Allied bomb was dropped on it during the operation.

Much useless equipment was salvaged from the plant, which was valued at \$45,000,000.

## BY END OF YEAR

700 Veterans' Land Act Houses Will Likely Be Finished

OTTAWA—Only 709 of the 2,716 houses presently being erected across Canada under the Veterans' Land Act will be completed by Dec. 31, Gordon Murchison, director of soldier settlement, told parliament's special committee on veteran affairs.

Shortage of experienced labor and difficulty in obtaining the necessary building materials were two reasons why more dwellings could not be finished this year, he said.

All 2,716 houses included in the 1945 veterans' building program would be ready by May 31, 1946. By February 15, 534 of the houses would be completed; 710 by March 31 and the remaining 466 by May 31.

## NEW USE FOR SUB

RANGOON—The Burma government is seeking a submarine, with a view to solving the power shortage of electricity. A submarine, it said, could generate current for a large section of Rangoon.

## Canadians To Try High Nazi

MAJ-GEN. HARRY PORTER

COL. PETER WRIGHT

The first Canadian prisoner trial is expected to open Nov. 28 in the naval barracks at Aurich, near Emden, in the Canadian occupation zone in northwest Germany. The criminal is Major-General Kurt Meyer, former commander of the German 12th S.S. Hitler Youth division, who has been indicted for acts involving the shooting by his men of 48 Canadian prisoners-of-war in the Oise area during the battle of Normandy. His trial will be heard by a special Canadian military court headed by Major-General Harry Porter, former commander of the 1st Canadian division. Col. Peter Wright, O.B.E., of York Mills, Ont., has been detailed to act as Meyer's defence counsel. Other Canadian trials of Nazis are expected to follow.

## Difficulties In The Matter Of German Control

BERLIN—Field Marshal Montgomery said that Allied co-operation has fallen short of making the four-power government of Germany effective, and that British authorities are taking precautions against any further attempts caused by winter hardships.

He said French reluctance towards setting up a central administration for Germany was the chief obstacle to the great powers' control of the beaten Reich.

He took a grave view of the possibility of civil strife in Germany, saying "they may well have a disastrous effect on the recovery of the country."

The commander of the British occupation zone described the present machinery for control of Germany as "one of the boldest experiments in the history of international co-operation," but added that if it fails "the prospect of successful co-operation between the great powers in a wider field will be much impaired."

Expressing his views at an Armistice Day press conference, Field Marshal Montgomery said:

"There is no need for me to tell you the chief obstacle that stands in our way... I know very well that this is not the only obstacle so far to reconcile the view of France in this matter with that of the three powers which sat together at Potsdam and agreed to establish this central administration."

The field marshal expressed the belief that a way around these difficulties "will be found" adding that such a step was necessary because of "certain practical considerations demanding early action" and saying powers in coming to grips with the economic situation throughout Germany.

Official statements had said previously that if France persists in opposing a central administration, the other powers would attain this end by effecting two-way agreements between military zone commanders. Approval of a central administration by the Allied control council, of which France is a member, requires a unanimous vote.

## POLISH ARMY

Demands Of The Return Of Troops From Abroad

WARSAW—A Polish newspaper said that the government was making "energetic demands" for the return of the Polish Army from abroad, fully armed and equipped, despite rumors the government feared their return might lead to a revolution.

An article in "Zycie Warszawy," which reflects semi-official opinion, was the first official statement on one of the most ticklish problems in smoothing relations between the Poles at home and abroad.

Discussing Foreign Minister Wincenty Reyzner's visit to London, the newspaper said the repatriation of Polish forces from Britain and the western areas would be the first question on his agenda.

## LAKE FLEETS

Carriers Are Ready To Carry Away

FORT WILLIAM—A fleet of 30 lake carriers, representing 1,400,000 bushels of grain as well as net tonnage, is being loaded into lakehead harbors over the weekend for weathering a blustery fall storm.

The ships will carry away approximately 1,400,000 bushels of grain as soon as elevators can fill their bins. Total capacity of the fleet is estimated at 8,000,000 bushels of wheat.

## Veterans' Land Act Applications Being Received

OTTAWA—Nearly 36,000 applications under the Veterans' Land Act are anticipated by the end of 1946 and of that total only 50 per cent. are liable to be settled.

This prediction was made by Gordon Murchison, director of the Veterans' Land Act, in remarks preliminary to study of the act by the veterans' committee of the commons.

He said he did not think it would be "sound public business" to attempt to establish the whole 36,000 by the end of 1946.

Mr. Murchison also disclosed that of the 8,334 properties appraised for eligible purchase up to the end of October 2,329 had been turned over.

Total acreage purchased was \$453, 146 worth \$9,267,640.

The average sums paid for land and buildings ranged from \$35.54 per acre in British Columbia to \$144.18 in Saskatchewan.

Applications for qualification under the act had jumped from 4,907 in April 30, 1945 to 18,705 by November 1.

Outlining causes for delay in granting them, Mr. Murchison said one of the numerous reasons was that the veterans often failed to bring along his wife when the time came to consult his advisory board.

Applicants had been turned down because the advisors decided the wife would never be contented under the terms of life her husband had decided upon.

He said agreements had been signed with the prairie provinces and were being negotiated with Ontario, Quebec and British Columbia to permit settlement of veterans on lands owned by those provinces.

It also was planned to help some of the 2,500 Indians who had served in the Second Great War to become re-established on their own reserves.

## WOULD NOT SAIL

LONDON—Four New Zealand Australian and Royal Navy Royal Air Force officers and warrant officers refused to sail for Australia aboard the Orient liner Orion because of what they termed "disturbing overcrowding."

AWAITING TRIAL—Tokyo Rose, the Los Angeles-born Japanese girl, Iva Toguri, who nightly broadcast Jap propaganda to the U.S. troops, is held in Yokohama awaiting trial for treason.

## ANSWER IS NO

Atomic Explosives Could Not Be Used In Construction Work

WASHINGTON.—The question: Could atomic explosives be employed for construction work, such as ditch-blasting?

The answer: No.

The authority: Maj.-Gen. Leslie H. Groves, United States army atomic bomb chief and veteran engineer.

"At the present stage of development of the atomic explosive, at least, I can't conceive of its being employed for construction purposes," Gen. Groves said in an interview.

He was asked specifically if it would be possible to employ "small amounts" of an atomic explosive, touched off as about a quarter of a mile apart—as to blast out a canal ditch more quickly and efficiently than with dynamite.

"In the first place," he said, "there is no such thing as employing amounts of atomic explosive less than the minimum required to explode an atomic bomb."

"Unless you have a certain amount of the constituent materials in the bomb—known as the 'critical mass'—you get no explosion at all. And once you get an explosion you get a tremendous uncontrollable explosion—not the controlled type that would be needed to excavate for construction purposes."

## AWARDS GIVEN

Investure At Buckingham Palace

Honors Twenty-two Canadians

LONDON—Twenty-two Canadians received awards from the King at a Buckingham palace investiture which included honors to two of the men who have been seen in atomic bomb explode.

Canadian awards included D.S.C.'s to Lt.-Col. Gordon Minto Churchill, Winnipeg, former officer commanding the Canadian Armored Cavalry Regiment and now dean of faculty at Khaki university, and to Lt.-Col. Mrs. George Johnston, Toronto, who also received the O.B.E.

The King knighted Prof. James Chastice, British scientist who headed the British atomic research group at the United States and was the experimental bomb built in New Mexico.

Lieut. the King knighted with Group Capt. Geoffrey Cheshire, R.A.F., who flew as an observer with the American crew which dropped the atomic bomb on Nagasaki and who received the Victoria Cross for 100 bombing missions during four years of fighting, as well as a second bar to his D.S.O.

## UP TO VETERANS

Should Provide Leadership For Reserve Forces Says Air Minister

OTTAWA—Canada is looking to its war veterans to provide leadership and experience for the reserve forces "which can be rapidly expanded in the event of a new emergency," Air Minister Gibson said here.

In a speech prepared for delivery to a Canadian Legion Remembrance Day dinner, Col. Gibson said that the common, ordinary, foot soldier will continue to be a vital factor in the winning of battles.

Canada could afford to maintain "large and powerful" armed forces, he said, but it was generally recognized that there must be an efficient reserve.

He believed veterans groups should have national affiliation.

## CONDITIONS IN EUROPE

BOSTON—Gen. Eisenhower said "there must be instant adoption of a system to return the boys back to America's obligation to the world and to ourselves must be met. Are we going to let the boys languish in Europe that we are going to abandon unfulfilled the purposes for which we fought or are we going to have the strength to see the job through?"

He said in a speech at a state dinner given by Gov. Maurice Tobin.

## Fear British News Service Is In Danger

LONDON—The Press News in an editorial in its latest issue said it was "disquieted" by the government proposal to nationalize telecommunications linking Empire and commonwealth countries.

The newspaper Trade Weekly said it was not concerned with the merits of government control versus private enterprise.

All that was on behalf of the press, are concerned with is the greatest possible efficiency on which London's position as a world news centre depends," it added.

The British Empire cable chain is being increasingly challenged these days by America. Her cables are steadily encroaching and are keyed up to the highest speed in service. Much trans-Atlantic traffic is carried by them. They wait news—and more all over the world.

The aid test we impose on the proposed deal, therefore, will it improve the British Empire's capacity to serve high-level needs in press and commercial traffic? On the general form shown by government in commerce we doubt it.

"Cables and Wireless" record is good. Its skilled staffs are well paid. The staffs are well paid. The staffs are well paid.

However, they are on their toes to meet the challenge. They are on their toes to meet the challenge. They are on their toes to meet the challenge.

(Cable and Wireless, Limited, operates most of the tele-communications, through different parts of the British Empire.)

## RULING ON PARCELS

More Gift Items Can Be Sent To

OTTAWA.—Postmaster General Bertram announced that effective immediately, parcels sent to the seven European countries will no longer be limited to food, toilet articles, drugs and medicine.

However, he said that certain articles of clothing, such as coats, suits, may be subject to import restrictions in the countries of destination and that the sender must ensure the articles they post are exempt from such restrictions.

Eleven-pound parcels, not exceeding \$25 in value, can be sent to Belgium, Luxembourg, the Netherlands, Norway, Sweden and Switzerland.

Four-pound parcels, not exceeding \$25 in value, can be sent to Italy and the Vatican City.

## DEBT TO CANADA

British Chancellor Of The Exchequer Praises Dominion

LONDON.—Britain's indebtedness to Canada is £100 million plus some claims arising out of the war which have not yet been determined, Hugh Dalton, chancellor of the exchequer, told the House of Commons.

"I think it is widely known that the Canadian government has behaved with the most splendid generosity in the matter of the war, giving great treasure to the common cause," he said.

His comment came in answer to a question from Col. F. E. Errol, Conservative, of Aitkenhead.

Mr. Dalton said indebtedness to France was "nil."

## UNUSUAL VOYAGE

French-Canadian Sailors Towing Tugs And Drifts To France

SOREL, Que.—A hundred French-Canadian sailors are crossing the Atlantic on an unusual and somewhat hazardous voyage, from St. Lawrence river port to St. Nazaire, France. They are navigating tugs and four drifts, which are being towed to France.

The vessels will probably make one of the slowest Atlantic crossings known to modern seafaring history, as the quality of candy canes and hard candy specialties normally available at Christmas.

## CANDY CANES

OTTAWA.—Those candy canes which usually decorate the Christmas tree won't be so prevalent this Christ-mas. This was the word from a private board spokesman, who said that shortage of labor in the candy industry and a short sugar supply will "reduce" the quality of candy canes and hard candy specialties normally available at Christmas.

## PLANE NOT THERE

WASHINGTON.—A British official said a C-54 transport plane, furnished Winston Churchill by the United States when he was premier, had been turned back. "It is not our plane," said the official who asked to be anonymous. Its purpose has been served, he indicated, and it should be returned.

### Christmas is Not Meatless

"Meatless Tuesday" ruling will be rescinded for Christmas Day and New Year's Day, both of fall on Tuesday, the Wartime Prices and Trade Board announces.

Making the announcement, Prices Board Chairman Donald Gordon explained that the amount of meat which is normally served in Canada as a supplement to the regular "turkey" dinners is so small that enforcing the regulation would cause more annoyance than the saving would warrant. Also, Canada's exports of meat have increased steadily since rationing was reimposed, and deliveries would not be seriously affected by allowing a small amount for holiday festivities.

Though the meatless day restriction is relaxed for Christmas and New Year celebrations, prices must be in line with 1941 levels.

### Jolly Miller

It's the fifth year for Alan Savage with "Jolly Miller Time", the CBC variety musical that goes on the air on Wednesdays. As producer and announcer for the program this season, Mr. Savage confirms his reputation for skilled performance in Canadian radio.

### Off the Record

OTTAWA—There is something which we do not understand about the activities in Ottawa. The more the Government contracts in the way of expenditures the larger the national debt seems to become in time!

### Present Situation Temporary

The present price system whereby producers of feed producers of feed barley receive the same equalization fund payments as producers of malting barley, is temporary and consider this year's crop. In a letter from the Hon. J. H. Gardiner, Dominion Minister of Agriculture, which was read at a special meeting of the Marketing Committee of the National Barley and Linseed Flax Committee held in Winnipeg on November 16th, under the chairmanship of Prof. T. J. Harrison, it was stated, "This is only a temporary thing having to do with this year's crop. It will be made very plain before the seeding of the next crop that farmers cannot rely upon this price for any barley other than malting barley." The committee reviewed the present barley situation and was pleased to have the assurance of the Hon. J. G. Gardiner that the price situation is temporary and that farmers will be informed officially to this effect. Although the current shortage of feed has prevented the export of malting barley, farmers would be well advised to at least maintain and even expand the production of malting varieties for which malting premiums will again be paid.

## BANK OF MONTREAL

**Report**

More than a million Canadians keep their money safe at the B of M. Each of the Bank's 1,000,000 deposit accounts is an expression of trust in this 128-year-old institution. The money on deposit, totaling \$1,611,000,000, is being constantly employed for the financial needs of the nation, of business, and of citizens in every walk of life.

Business firms and private citizens from the Atlantic to the Pacific have, during the year, borrowed and repaid many millions of dollars from the B of M. Now, standing at \$220,000,000, the Bank's loans roll the wheels of commerce and industry... speed their expansion... create employment... and help Canadians in their personal day-to-day financing.

Well over one hundred thousand individual Canadians—plumbers and painters, truck drivers and trainmen, doctors and dentists, business men and business women—turned to the B of M during the last twelve months for a Personal Loan when extra money was needed to take advantage of an opportunity or meet an emergency. Ninety-four per cent of every hundred who asked for money got it.

To buy seed, to market crops, to improve their farms... grain growers, cattle and poultry raisers, fruit growers and fur breeders—farmers in every line of agriculture—borrow at the B of M. These farmers borrow not only bring comfort and prosperity to the country, but, by enabling farmers to produce more, contribute to the prosperity and welfare of the whole nation.

In financing the needs of government and of business, the Bank shares heavily by investment in government and other bonds and debentures. Throughout the war these investments have increased tremendously and today they amount to well over a billion dollars. The majority of these are gillette securities, maturing at early dates, and are readily marketable.

### Three Hills Vote for Water

The ratepayers of Three Hills voted overwhelmingly—194 in favor to 15 against—for the money by-law to spend \$175,600 on installing waterworks and sewage systems in their town.

The property owners in our neighboring town have, after many years, awakened to the realization that forward-looking urban communities must keep abreast of the times and provide modern water and sanitary facilities, if their community is to grow and prosper.

Towns go forward or backward according to the attitude adopted by those in charge of the civic government and the rank and file of its citizenry. Three Hills is to be congratulated on a lightning itself with those forward-looking urban centres that have decided to grow and develop.

#### RESOURCES WHICH THE B of M HAS TO MEET ITS OBLIGATIONS:

CASH... The B of M has cash in its vaults and money on deposit with the Bank of Canada amounting to . . . \$ 161,907,891.42

MONEY in the form of notes, cheques on, and deposits with other banks (payable on demand or at short notice) . . . 124,065,250.42

INVESTMENTS: The B of M has well over one billion dollars invested in high-grade government bonds and other securities, which have a ready market. The majority of them will be paid in full at early dates. Listed on the Bank's books at a figure not greater than their market value, they amount to . . . 1,117,601,002.85

STOCKS of industrial and other companies form but a small part of the Bank's holdings (actually only 1/2% of all its investments). Valued at no more than the market price, they amount to . . . 353,993.67

CALL LOANS: The B of M has call loans (loans payable on demand) which are well protected by quickly saleable securities. These loans amount to . . . 60,417,105.51

QUICKLY AVAILABLE RESOURCES: The resources listed above, all of which can quickly be turned into cash, cover 87.4% of all that the Bank owes to its depositors and others. These "quick assets" amount to . . . \$1,664,326,243.90

LOANS: During the year, millions of dollars have been loaned to business firms, to farmers, to fishermen—to citizens in all walks of life, and to Provincial and Municipal Governments and School Districts. These loans now amount to . . . 220,264,344.15

BANK BUILDINGS: In hamlets, villages, towns and large cities from coast to coast the B of M serves its customers at 470 offices. The value of the buildings owned by the Bank, together with furniture and equipment, is shown in its books at . . . 10,371,640.18

OTHER ASSETS: These chiefly represent liabilities of customers for commitments made by the Bank on their behalf, covering foreign and domestic trade transactions, totalling \$16,995,837.56

TOTAL RESOURCES WHICH THE B of M HAS TO MEET ITS OBLIGATIONS . . . \$1,715,934,320.49

#### WHAT THE B of M OWES TO OTHERS:

DEPOSITS: Business firms, manufacturers, merchants, farmers and private citizens, numbering well over a million, have money on deposit with the B of M. These deposits amount to . . . \$1,613,428,795.56

BANK NOTES: B of M bills, in circulation, which are payable on presentation, amount to . . . 66,090,26.50

OTHER LIABILITIES: Miscellaneous items, representing mainly commitments undertaken on behalf of customers in their foreign and domestic trade transactions, totalling \$16,995,837.56

TOTAL OF WHAT THE B of M OWES ITS DEPOSITORS AND OTHERS . . . \$1,687,192,386.05

TO PAY ALL IT OWES, THE B of M HAS TOTAL RESOURCES AS SHOWN ON THE LEFT SIDE OF THIS STATEMENT, AMOUNTING TO . . . \$1,715,934,320.49

WHICH MEANS THAT THE B of M HAS RESOURCES, OVER AND ABOVE WHAT IT OWES, AMOUNTING TO . . . \$ 28,741,934.44

This figure of \$28,741,934.44 is made up of money subscribed by the shareholders who own the Bank and, to some extent, of profits which have from time to time been ploughed back into the business to broaden the Bank's services.

PROFITS: After making provision for contingencies and after providing \$379,440.48 for depreciation of Bank premises, furniture and equipment, the B of M reports a profit for the twelve months to October 31st, 1945, of . . . \$5,719,681.58

Taxes under the Income and Excess Profits Taxes Acts are estimated at . . . 2,785,000.00

Leaving a net profit of . . . \$2,934,681.58

Of this amount, shareholders (paid dividends at the rate of 60 cents a year for each \$10-share of the Bank) received or will receive . . . 2,160,000.00

Thus, the net amount to be added to the balance of profits from previous operations is . . . \$ 774,681.58

Balance in the Profit and Loss Account at October 31st, 1944, amounted to . . . 2,413,821.32

Leaving the balance in this account at October 31st, 1945, at . . . \$3,188,502.90

# Potential Tourists Are Now Making Plans for Next Year's Vacation in Canada's Parks

THE number of establishments catering to the tourist trade in the national parks, as elsewhere, was seriously curtailed during war time. Frequently it was not possible to supply all the accommodation required, and it may be some time yet before these tourist facilities will be able to meet the full demand.

But what about holiday travel in the meantime? A great army of potential tourists is now making plans for next year's vacation. The majority of them, after years of stress and strain and self-denial in the interests of the war effort, are in the mood to postpone that much-talked-about holiday any longer. If there is not sufficient accommodation in the place of their choice, many of them will simply take the necessary accommodation along in their car or trailer. That is, they want what hundreds are planning to do next summer.

In years gone by many visitors to the national parks brought with them their own camping gear, tents, camp stoves, fuel, and modern sanitary facilities. Further, they made improvements to these camp-campgrounds to be made before the next tourist season comes around. They made national parks can adequately take care of all visitors and provide more comfort for them.

These camp-campgrounds are popular with national tourists. They are emphasized in a recent letter received from a visitor from Tokyo, Canada. Here in part is what he says:

"Having completed a short time ago a three-week trip by car, which included a five-day visit to your country through Calgary, Banff, Lake Louise, Jasper, Yoho, Kootenay and Cranbrook, may I express my appreciation for the reception given us and the excellent facilities and good feeling between the two countries. I had no trouble in crossing into Canada nor in leaving Canada, and the exchange of currency, which I had dreaded, was no trouble at all. I had stayed at the camp-campgrounds in the parks, and many of them that they are well planned, purpose—well situated, clean and with adequate food provided. The trip was a pleasure and I intend to visit you again."

A holiday, to be most beneficial, should provide as far as possible complete change from one's regular environment and customs. A holiday under canvas in the national parks is about as complete a change for the average city-dweller as he can imagine. It is going to be popular with men and women recently discharged from the armed forces who have learned to live out-of-door conditions.

So, while visitors to the parks wishing to stay at the camp-campgrounds may find that the low camps may make their reservations well in advance, those who are unable to do so, or who prefer to live in the open, should assemble the necessary camping equipment and be ready to go when the open season becomes their next spring or summer. The camp-campgrounds have no mindings about getting adequate accommodation in the parks. He carries his accommodation with him, and, like the visitor from Kansas, will return home feeling that the trip was a real pleasure.

**Atomic Village**  
It is Said Will Be Constructed Near Toronto

Britain's top scientific job—director of the Atomic Energy Commission at Berkeley—will be given to Prof. John Douglas Cockcroft, wartime head of the British radar research group, the London Daily Express said.

Cockcroft, a Cambridge University physicist, was said to be in Canada supervising construction of a model atomic village near Toronto.

The Express said he had accepted the post on condition that his wife should not be kept strictly secret. He was said to favor secrecy for designs and method of assembling atomic bombs but to believe basic facts of atomic physics should be published to combat scientific superstition.

**CANADIAN STAMINA**  
Canadian prisoners of war reaching Manila from Japan were in better shape than those of other nationality, Maj. A. C. Burwick of Vancouver, was said in an interview at Montreal.

He was seen in command of the Canadian military rescue team which drew off wounded men from the return of men to Canada.

**NEW FORM OF FUEL**  
Pressed wood logs, made from waste which formerly went into the paper mills, are being produced by a lumber company in Northern Ontario, and are said to burn better than the original wood from which they have been saved. This is the first time that industrial waste has been used in such a way.

# Human Mind Too Slow

Robots That Think Fast Are Predicted For Next Year

Robot air machines that can "think" and act faster than their men creators figure heavily in the U.S. Navy's plans for the nation's future.

"Man's mind will be too slow for combat of the future," the Navy said, "but a robot's mind can devise the defense."

Promising the vigorous pursuit of peacetime research in naval aviation, the Navy said it was planning a Navy release predicted:

"The pilotless aircraft of the future, controlled by electronic, will 'home' electronically on its target. Electronic 'brains' will guide the counter-missile with precision. Out of research and development programs will come airborne radars which can initiate defense."

Plans call for experimentation in new types of piloted aircraft, related aircraft of all types, methods of propulsion, fuels and aerodynamic principles.

With improvements in turbo-jet engines, the rate of development will speed a prime characteristic of a fighter aircraft, future Navy fighters will probably be jet-powered, possibly with rocket assistance for short bursts of extremely high speed, the Navy said.

# A Special Method

Montreal Man's Idea For Stretching Shoes Not So Good

Shoe merchants need to have a sense of humor these days. A local shoe merchant reports that a dissatisfied customer arrived at his store with a pair of shoes broken open across the vamp and toe-cap. Upon questioning, the irate customer explained that the shoes were a bit too small and that when he tried to stretch them the stitches had popped right and left and that they were obviously of poor quality.

The shoe merchant suggested that the fault must be with the shoemaker in stretching them by applying too much force.

"Oh, no," said the customer, "I stretched them myself."

The customer explained that he had put a bean bag in each shoe and had poured water on the beans. The merchant advised him as delicately as possible that he had been a little too original in his method of stretching shoes and that hereafter he would be well advised to take light shoes to a shoemaker.

# Lucky Service Men

Thousands of British service men being demobilized are in luck. Because the supply of medium quality civilian suits has given out they are getting clothes of finest quality. The supply of medium quality civilian suits has given out they are getting clothes of finest quality.

**NEW X-RAY TUBE**  
Development of an X-ray tube capable of producing rays of an intensity hundreds of times greater than heretofore attained was announced by Prof. George L. Clark, University of Illinois X-ray expert.

**THE WOLF PEACH**  
Centuries ago, the tomato was called the "wolf peach" because it was thought to be poisonous. The so-called "wolf peach" was given to the wolves to destroy them.

**To Fight Malaria**  
New Drug Is Discovers That Holds Out Much Promise

Discovery of a new drug to combat malaria, which takes 3,000,000 lives annually, was reported to the Liverpool School of Tropical Medicine.

**CHURCHILL'S PAINTINGS**  
Picture painted by Winston Churchill have been brought to the United States for reproduction in book form. The collection includes several paintings executed during Mr. Churchill's military service in the Riviera and in the Italian lake country. Mostly landscapes, they were flown to the United States from London by clipper.

# Col. Dunbabin Of Australia Had Four Stirring Years In The Eastern Mediterranean

(From The Empire Digest)

"A LL good archaeologists are in the army," said Sir Leonard Woolley. "Of the children of the earth, and they usually have something to do with the Intelligence Service. In the army, Col. Dunbabin, D.B.O., is Australian (Tasmanian to be exact) by birth, archaeologist by occupation, and is just about to wind up four stirring years in British intelligence in the Eastern Mediterranean."

# Difficult Problem

Compensation To Owners In Britain's Post-War Planning

Prime Minister Attlee's Labor Government is going to tackle one of the most contentious problems in Britain's post-war planning—compensation to the owners of property requisitioned for reconstruction and reconstruction schemes.

Winston Churchill's Coalition Administration weathered its most serious inter-party storm last season by making big changes in the compensation clauses of its £2,000,000,000 town and country planning bill. Many of Mr. Churchill's Conservative supporters claimed that at March 31, 1939, the yardstick under which the bill was passed was the act—were too low.

Property values have increased tremendously since the war began. To meet the Conservative objections a new bill, which increases compensation over and above the 1939 level, was provided on virtually all types of property.

Labour was dissatisfied with this concession to property owners, arguing that big land-holders stood to benefit most. They accepted the bill, however, as a step in the right direction. Now a Labor government is in power and changes in the bill are in prospect.

# Valuable Minerals

Will Prospect For Uranium Deposits In South Africa

South Africa has uranium, the basic composition of the atomic bomb. The deposits have not been explored but it is possible that prospecting will shortly be undertaken on a wide scale.

In 1939 Dr. William Vansand, government chemist, referred to the existence of radioactive minerals in the Transvaal and Swaziland. Uranium was one of them. Later, Dr. A. L. Hall, then assistant director of the Union Geological Survey, announced the existence of "uranium ore" in a small area in the north-west of the northern Transvaal.

Not far from 1939 in the northern Transvaal, Dr. Hall found uranium ore, a discovery of great importance. As recently as 1939 the Union Geological Survey stated that there was an abundant occurrence of pitchblende (the uranium-bearing mineral) from which uranium is usually recovered) at Gordonia, in the north-west of Cape. Small quantities of uranium-bearing minerals have also been discovered in other parts of the country.

# To Dodge Bombs

Inventor Has Idea To Slide New York's Skyscrapers Underground

A New York engineer says he's figured out how to save Gotham's towering skyscrapers if, in some future war, atomic bombs began falling on the city.

Just dig a hole under them, install giant elevators and, he suggests when an atomic attack occurs, lower the buildings beneath the ground.

Morris Berman, a former engineer with the New York Board of Transportation, is author of the plan.

The Empire State Building, the engineer explained, could descend in exactly 18 seconds, dropping at the rate of 1,000 feet a minute.

Unfortunately, it would take a little longer to get it back up again. In the Berman estimate, it would require five 2,250-horse-power engines running 22 hours to lift the minnow-building to its normal height.

# Peace Time Sight

The London Daily Sketch says one of London's most popular peace-time "sights" has come back to the war-scarred metropolis—the ceremonial marching of the guard at the Home Guard.

A contingent of the Life Guards with a trumpeter on a white horse represented the old guard and the new guard was furnished by the Royal Life Guards. The ceremony will again be repeated daily.

# Peace Time Sight

Lessons learned in the construction and operation of "Mulberry" (the floating harbor used in the invasion of Europe, might be put to peacetime use in Northern Canada mining and in the remote lake where mineral deposits were on the shoreline or in the water.

The idea was suggested at a conference by Col. V. C. Ritter-Webster, one of the men who developed "Operation Mulberry."

**PEACE TIME SIGHT**

## DRUMHELLER MUNICIPAL HOSPITAL Sale of Special Contracts

The Board of the Drumheller Municipal Hospital District No. 3 announce that special contracts will be sold to those non-ratepayers resident within the boundaries of the hospital district who are desirous of obtaining the \$1.00 per day rate, and reduced rates for extra services for themselves and their immediate dependents at the hospital in Drumheller. Sale of these contracts will begin immediately and will continue until January 15th, 1916. These contracts will be effective January 1, 1916 and will be in force until December 31, 1916.

Contract may be purchased at the Business Office at the hospital in Drumheller for the sum of \$10. Remittances may be made by mail. Any further particulars may be obtained from the undersigned.

Leonard Wilson,  
Secretary-Treasurer.

## A Great New World Is Dawning

Under the stress of World War II, science, engineering and industry raced ahead. They crowded into days the normal progress of years.

Electricity aided and speeded each small step—made possible each great advancement. And in the new world dawning, Electricity is the stimulus through which wartime achievements are being turned to the service of mankind.

## LOCAL NEWS

### BE A BOOSTER

Mr. G. McCracken was a Calgary visitor this week.

The Carbon Old Timers Association will hold their annual general meeting at W. A. Braisher's store on Saturday, Dec. 8 at 3 p.m. The balance sheet showing the state of finances will be read at this meeting and officers elected for the coming year.

A very enjoyable evening was spent at the home of Mr. and Mrs. Leo Ohlhauser on Monday, Nov. 26, when a group of young people gathered in honor of Kay Schafer, Mrs. Ohlhauser's sister, and Harold Oater, visitors from Medicine Hat.

The evening was spent in playing games followed by a delicious lunch served by the hostess. Kay and Harold have the best wishes of this group which was present.

At last one of our new subscribers to the Chronicle who spends most of his time complaining that he never gets his name in the paper, moved out of town this week end. That's right, Mr. and Mrs. J. Hunt were visitors to East Coulee.

Sid Wright is attending a deisel school in Calgary this week.

G. McCracken was a busy man for a while last week when his cattle insisted on taking a bath in the water-hole.

Max McGowan and family moved to Calgary this week.

There will be skating every week night on the Carbon rink except Wednesday, which will be hockey nights.

A number of local Shriners attended the convention in Calgary last week.

Approximately \$1000 was realized at the bazaar sponsored by the Ladies' Aid last Saturday. It was the most successful bazaar for some time.

Teaching service in Carbon United Church on Sunday in the morning at 11 o'clock.

The weather continues mild with chinooks blowing almost every day.

Trochu and Carbon will open the hockey league with a game in Carbon on Sunday at 2.30 p.m.

Bill Ross is driving a hoodless car these days. Seems his Chev. came out second best with an international truck.

Mr. and Mrs. W. Shantz were Sunday visitors to Carstairs.

Wanted to rent—half or quarter section land. Apply Chronicle.

Members of the Linden Mennonite church have donated more than 1,000 quarts of canned meat and a carload of flour to be shipped to Europe.

For subscriptions to magazines and newspapers, see your local postmaster. He will save you money.

Secretary's of local clubs and lodges are invited to send in accounts of their meetings for publication in the Chronicle. There is no charge.

Printing of every description at the Chronicle Office.

Pte. and Mrs. R. Spry of Calgary spent a few days at the home of Mr. and Mrs. Eli Spry.

Christmas trees at the Crown Lumber this week end.

Place your order for Counter Check Books at The Chronicle Office. We are direct factory representatives and can quote you the same prices, delivered in Carbon with all taxes paid, as can any traveler or salesman making orders. Buy in Carbon whenever possible and especially when it does not cost you any more to do so.

Wanted to rent. Half or quarter section of land. Apply Chronicle.

Liaison Director Service  
Winipeg Manitoba

### VARIETIES OF WHEAT

The popularity of different varieties of wheat is a matter of interest to all farmers, and of importance to those intending either to buy or to sell seed. According to the annual survey made by Line Elevators Farm Service, the changes in acreages of different varieties between 1914 and 1915 are simply a continuation of changes apparent between 1914 and 1915.

### Prairie Provinces

The 1915 percentages of the total area occupied by the different varieties, with 1914 percentages in brackets, are as follows: Thatcher, 55.3 (52.8); Red Bob, 11.9 (13.3); Marquis, 10.9 (13.2); Regent, 8.5 (7.5); Renown, 3.5 (4.2); Durum, 2.9 (2.5); Apex, 2.7 (3.8); Garnet, 2.0 (2.0); others, 1.7 (1.7). Similar data for individual provinces are set out below:

### Alberta

Red Bob, 40.4 (44.2); Marquis, 23.8 (27.3); Thatcher, 22.2 (16.4); Garnet, 7.5 (6.0); Canus, 1.0 (1.5); Regent, 0.7 (1.2); others 3.3 (2.9).

### Saskatchewan

Thatcher, 77.7 (71.1); Marquis, 7.5 (9.6); Apex, 4.6 (5.0); Regent, 3.4 (3.6); Renown, 2.1 (2.6); others, 5.4 (4.5).

### Manitoba

Regent, 40.1 (34.6); Thatcher, 27.1 (29.3); Renown, 13.7 (16.4); Durum, 8.3 (7.5); Apex, 1.0 (0.7); others, 1.4 (0.9).

Even in Alberta Marquis appears to be losing ground steadily. It is fitting, at this time, to remember that even when Marquis disappears its influence will be profound because it appears in the ancestry of Thatcher, Regent, Renown, Apex and Canus.

These data, with 1914 figures for comparison are being reprinted in leaflet form. Copies may be obtained from Line Elevator agents.

## GOOD YEAR

TIREWISE, ELIGIBLE BUYERS PREFER GOODYEAR SYNTHETIC RUBBER TIRES... HERE'S WHY

WITH GOOD YEARS YOU GET THESE 6 EXTRA VALUES

- 4-way traction for greater grip.
- Compression tread for longer wear.
- Self-resting tread design for greater safety.
- Tough, resilient Swastika cord body for longer life.
- High tensile steel beads for extra strength.
- Goodyear quality, skill and experience for long, trouble-free mileage.
